

## aromamatic 2inOne vaporizer One Year Guarantee

Aromamatic® Products Pty Ltd guarantees for a period of one year from the date of purchase to replace or repair any electrical components of the Aromamatic® 2inOne Vaporizer found defective by the manufacturer or their approved agent. This Guarantee does not include replacement of a damaged or broken ceramic bowl or external damage to the electrical cable or plug. The Aromamatic® 2inOne Vaporizer must only be used with power supply indicated on the base plate. If the supply cord of this equipment is damaged, it may only be replaced by a repair shop appointed by the manufacturer. If the base plate has been broken or forcefully removed, this Guarantee is void.

## aromatherapy 2inOne electric vaporizer essential oil & wax melt

*enhance your life  
aromatically*

*Guarantee &  
Instruction Card*

*Safe - Clean - Efficient - Reliable - Water free*

TB 0817

## Operation Instructions

Plug the vaporizer into a standard electrical outlet and turn the power on.

Please allow up to 15 minutes for the vaporizer to reach full operating temperature.

Then simply add your favourite Essential Oils/blend or Soy Wax Melt Tart to the bowl, as recommended.

Take care not to overfill the vaporizer as spilled oils or wax may damage some surfaces. *The Vaporizer does not require water.*

### Essential Oils Directions

Add 8-10 drops of your favourite pure Essential Oil or Essential Oil Blend to the recessed bowl and enjoy.

Please note use only Essential Oils or Essential Oil Blends, as Essential Oils diluted with base/carrier oils eg: 3% Rose in Jojoba oil, will not vaporize.

Use our recommended quantities.

Respected Essential Oil brands are less likely to contain impurities, which will not vaporize.

### Wax Melts Directions

Remove all labels and packaging from the soy wax melts before use.

Then add your favourite Soy Wax Melt or Tart to the bowl - do not overfill the bowl. The dissolving time of individual Soy Wax Melts will and can vary with different products.

To remove used Soy Wax Melts, ensure the melt has cooled and hardened before gently dislodging it from the Vaporizer. Wipe clean and replace with a fresh melt/tart as desired.

## Caring for your Vaporizer

When your essential oil has vaporized from the bowl, simply wipe it clean with a damp cloth.

Alternatively, add 2-3 drops of essential oil or vaporizer cleaner to the warm bowl to loosen any residue that may remain.

Always remember to clean your vaporizer regularly to prevent residue buildup.

## Customer Assistance Guide

### Q: Why don't I use water?

A: The heat emitted by the recessed bowl of the vaporizer is low, which means that it is warm enough to vaporize Essential Oils but not hot enough to burn them.

This makes the use of water unnecessary as it is not needed to control the temperature.

Soy Wax Melt/Tarts do not require water to assist the dissolving/melting process.

### Q: How long will the Essential Oil or Soy Wax Melt last?

A: This depends on the aromatic characteristic of the Essential Oil or Soy Wax Melt used.

Some Essential Oils will vaporize more quickly than others. Essential Oil Blends vaporization time will depend on the combination used.

For wax melts please refer to supplier's information.

### Q: What happens when the oil has finished vaporizing?

A: NO harm will come to the vaporizer when the oil has vaporized away.

### Q: Is it safe to leave the vaporizer on at the power point?

A: YES. With its low temperature control, the Aromamatic 2inOne vaporizer allows for a safe and continuous operation.

### Q: Why can't I smell the oil?

A: Aromas that are continually inhaled through our olfactory system will cease to be recognized after a period of time. This is called fading.

## The Touch Test

Turn the vaporizer on and allow it to reach full operating temperature. This will take around fifteen minutes. Lightly touch the centre bowl with your fingers. If it is warm to the touch and you cannot leave your fingers in the bowl, the vaporizer is heating and working correctly.
